

Advisory # **2023-A-042**

Control Tower Working Out of the Area Control Centre (ACC)

From: Airport Operations

Contact: Airport Duty Manager, 416-776-1104, ZZL-AirportDutyManagers@gtaa.com

Date: 2023-11-21

In order to facilitate work in the Toronto Control Tower, the controllers are required to relocate to the backup location at the Area Control Centre (ACC) between 0015L and 0530L on the following dates:

November 25, 26

December 2, 3, 9, 10

The North Ground frequency 121.65 will not be available during this time; the South Ground frequency 121.9 is to be used instead.

Ground movement within the maneuvering area is to be kept at a minimum; this includes aircraft repositioning (tows), aircraft maintenance (e.g., power runs), and other vehicle movements.
