

Advisory # [2026-A-010]

Subject Life Cycle Management – Subprogram A – Bridges Roads and Overhead signs improvements

From: Airport Development and Technical Services

Contact: Enio Ortiz, enio.ortiz@gtaa.com

Date: 2026-04-30

From May through August 2026, infrastructure improvements will take place around the Terminal 1 Highway 409 roadways and the Terminal 1 ingress and egress bridges at both the Departures and Arrivals levels.

During this period, sections of the roadway will be subject to partial lane closures. These closures are planned for approximately four months and are designed to maintain continuous traffic flow around the terminal. In May, the parking garage entrance at the Terminal 1 Departures level will be fully closed for a one-week period. Clearly marked alternate routes will be in place to ensure passengers and employees can move safely and efficiently around affected areas.

The contractor will execute the work in stages to support a safe, coordinated schedule while maintaining optimal terminal operations.

Passengers and airport users are advised to allow additional travel time when arriving at the airport and to proceed with caution when navigating through parking garages and adjacent roadways.

Note: All construction activities will be paused from June 10 to July 5 to maintain parking availability during FIFA events.
