

Advisory # 2018-A-017

**Subject:** New Apron Paint Markings –Gate H1 to Gate H6 Redesign

**From:** Aviation Services

**Contact:** Lars Olsson, [lars.olsson@gtaa.com](mailto:lars.olsson@gtaa.com), 416-776-3095

**Date:** May 3rd, 2018

In the coming days, Gates H1 through H6 will undergo a paint re-design in support of the Gate 193 Apron extension expansion project. The current gate locations (H1-H6) will shift slightly to the East. As a result, Taxilane 11W, Taxilane 11 and Taxilane 11E will be removed and replaced by Taxilane 13. In a future phase Taxilane 11 and Taxilane 12 will be painted. Head of Stand will become bidirectional and tail of stand road from Gate H1-H6 will be removed.

The bulk of the work will require a daily closure of a single gate to allow the paint redesign, with the gate being returned each night at the end of shift. When Gate H3 is painted, due to proximity, Gate H4 will be removed out of service for approximately 24 hours until it is in the new paint configuration. When the paint redesign of the taxilane is undertaken a full day closure of the area will be required, but returned at the end of the shift.

There will be no changes to the gate mix resulting from this work.

Please see the below drawing showing the current paint (red) and the new paint design overlaid, as well and the final paint configuration.
