

Advisory # **2018-A-054**

**Subject: Temporary Closure of entrance to Rainbow Road**

**From:** Airport Development and Technical Services

**Contact:** Milton Argotti, [Milton.Argotti@GTAA.com](mailto:Milton.Argotti@GTAA.com), 416-776-3727

**Date:** 2018-October-22

On October 22, 2018, a vehicle will be parked airside close to the Terminal building at the West entrance. The West entrance will be closed overnight from 22:00 until no later than 10:00 the following morning. A traffic management plan is in place.

As per OCC-18-723, Bridgecon Construction Ltd is approved to conduct a right lane closure in support of the rainbow road resurfacing. A truck is to be parked in lane closest to Terminal to support sand blasting operations. Truck can be removed with a 10-minute recall in the event the bus bay between Gate C25 and C27 is required.

The roadway resurfacing work is due to last three weeks. During this time, each section of the roadway will be closed for approximately 10 hours. Sections adjacent to access points will require closure of respective doorway for this period.

At no point will the entire tunnel be closed, and emergency access will be available from at least two of the three doorways at all times.

Please exercise caution when approaching the closed section of roadway as all vehicles will be requested to stop by flagging personnel and/or other construction traffic signs. Failure to obey flagging personnel and construction traffic signs could result in serious injury.

The roadway closure is necessary in order to complete the resurfacing work. Upon completion of the work, traffic will be restricted to authorized baggage operations vehicle only with uni-directional traffic flow from the West toward the central or East exit. The anticipated construction completion date is November 9, 2018.
