

Advisory # **2018-A-076**

Subject: T1 International NPS Relocation

From: Customer and Terminal Services

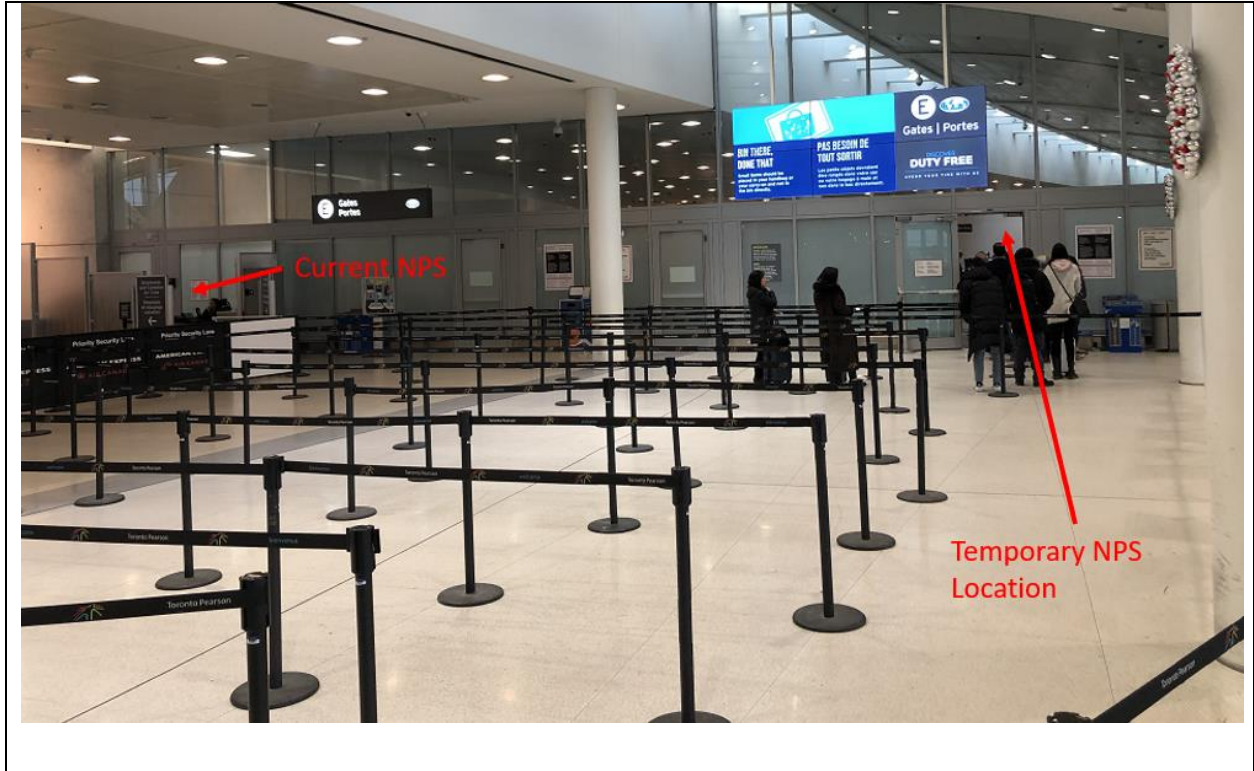

Contact: Paul Schenk, paul.schenk@gtaa.com, 416-776-3471

Date: 2018-12-19

On December 21, 2018 prior to morning start up, the existing T1 International NPS-T located on Level 3 will be relocated to accommodate terminal redevelopment. The NPS will be relocated on a temporary basis until early January when the position will move to the front of the new International Pre-Board Screening point.

During the interim period the NPS will be located slightly south of the current location and within the current Pre-Board Screening at Lane 1 (see diagram attached). The NPS will remain as a 24-hour location but after hours temporary pass issuance will happen at ED2070 on Level 2 as is currently done during the rest of the day. No temporary passes will be issued at this NPS.

Please take note, this point may be used as a Pre-Board Screening (PBS) lane during busy points of the day. When this happens, the lane will be operated in PBS rules and the standard restrictions on liquids and gels and other prohibited items will apply. During these periods you may wish to use an alternate NPS location such as the one on the Service Level or on Level 2. Signage will be in place to identify if the NPS is being used in a PBS rules configuration.

Please enter queue for the temporary NPS following the plan noted below for Crew and Employees. Signage will be provided on site to assist in wayfinding.
