

Advisory # **2019-A-042]**

Subject: Tow Coordination Frequency Change

From: Apron Management Unit

Contact: Edison Daza, Manager Apron Management Unit (AMU)

Date: September 13, 2019

Airport-Collaborative Decision Making (A-CDM) trials will commence Monday September 16th at 0600L. In order to facilitate this, the Apron Coordinator frequency **122.875 MHz** currently used for aircraft tow/reposition, will be repurposed for Flight Crews for A-CDM operations.

Therefore, **effective Monday September 16, 2019 at 0600L**, all aircraft requiring tow or reposition at CYYZ shall contact the Apron Tow Coordinator on frequency **136.525. MHz**.

The following information must be provided:

- Call Sign or Tractor #
- Aircraft Type
- Origin
- Destination
- Aircraft Civil Registration

Upon receipt of the required information, the Apron Tow Coordinator shall advise of the applicable frequency to contact.
