

Advisory # **2019-A-047**

Subject: Pier G, H Gates and New Taxilanes 11, 11E, 12, 13, 13E, 14

From: Aviation Services

Contact: Marjorie Thompson, Marjorie.Thompson@gtaa.com, 416-776-2794

Date: October 1, 2019

Please be advised the East Apron Expansion and Pier G (east side) project is nearing completion. This project will provide five (5) new Code C contact gates on the 193 extension and has added gating capacity on the off-terminal H gates. Six (6) new aircraft taxilanes have been added in a horseshoe configuration to support this new infrastructure. The new gates are supported with new two-way head of stand and tail of stand vehicle corridors.

Gates 249 and 247 will come online the week of September 30th with restricted passenger movements and bus operations for inbound passengers. This condition will remain until mid-November.

Gate 245 is not expected to be operational until late October.

Gate 255 will remain as aircraft parking only.

The new taxilanes support the following aircraft types:

- Taxilanes 11, 12, 13, 14 – Code C, max span of 36 meters.
- Taxilanes 11E and 13E – Code E, max span 65 meters

Please see the diagram below for more information regarding the Taxilane configuration.
