

Advisory # **2019-A-054**

Subject: Area 16 PSL Construction

From: AVS Real Estate

Contact: Joseph Fischetti, Manager, Airside Property Leasing and Development

Date: 2019-10-22

Effective October 28, 2019, Metric Group will commence construction of a new Primary Security Line (PSL) fence along the north service road at Area 16 of the Airport. Work will occur Monday to Friday from 0700 to 1700 local for three weeks. Delivery and placement of jersey barriers will temporarily reduce a small portion of the North Service Road for approximately four days, as depicted in the attached Appendix. The balance of the three-week PSL construction period will not impact the North Service Road.

Arrangements will be made with ASP to access the airfield via Security Gate 332 located on Bramalea Road. Metric will be under security escort for the duration of the work. A flatbed tractor trailer will be escorted to the site to deliver jersey barriers, also under escort. Construction barrels will be used to clearly identify where the flatbed is at any point in time. Metric will use traffic signs and a flag person to control traffic in the area. At the end of each day, the work area will be cleaned, and traffic will be reopened in both directions. All work will stop for emergency vehicles.

Once the PSL is permanently displaced, all construction in this area will be groundside.
