

Advisory # 2020-A-007

Subject: Pier G Expansion – Opening of Gate 245A

From: Aviation Services

Contact: Neal Samuel, neal.samuel@gtaa.com, 416-776-1108

Date: 2020-Jan-23

Please be advised that the construction of Gate 245A is approaching completion. Gate 245A is one of the temporary gates that will be constructed and operated to maintain gating capacity during the construction of the Pier G Expansion.

Gate 245A will provide gating for CRJ 100 and 200 aircraft. The operation will be ground load only and bowser fueling will be required.

Passenger access to Gate 245A will be through the F99 hold room. The passengers will use the new passenger boarding bridge and access the apron level by walking down an Avi-Ramp connected to the boarding bridge.

Gate 245A will come online on Tuesday January 28th at 1200. This condition will remain until late March/early April.

The configuration of Gate 245A is shown in Figures 1a and 1b below.
