These are unprecedented times, and the impact of COVID-19 is being felt across the Toronto Pearson community. Our airline traffic is decreasing as an effort is being made globally to stop the spread of this virus.

This change in airline schedules and operations has decreased our daily traffic from 1300 to 225 aircraft movements. This dramatic drop in airline activity has resulted in some of our airline partners making the difficult decision to either fully cease or significantly decrease their operations.

As a result, effective 1700L on March 31, 2020, the Infield Concourse will close temporarily, as the volume of passengers no longer necessitates the activation of this building.

If you have questions or concerns regarding this closure, please contact Stephan Rouleau or Francesco Fera.
