

Advisory # **2020-A-024**

Application of larvicide for mosquito control at Toronto Pearson

From: GTAA Aviation Services

Contact: Kevin Lacey, Kevin.Lacey@gtaa.com, 416-776-4274

Date: April 17, 2020 (Rev. April 18, 2020)

From May 11 to October 31, 2020, the GTAA will be conducting a larviciding program under the authority of the Medical Officer of Health to control larval mosquitoes in order to prevent their development into vectors of West Nile Virus.

The larvicide will be applied to catch basins and may be applied to selected bodies of surface water such as ditches and ponds on Toronto Pearson property depending on the results of testing for the presence of mosquito larvae.

Signs will be posted at surface water locations where larvicide is applied. All larvicides will be applied by The Ministry of Environment, Conservation & Parks licensed applicators or technicians.

For details on the exact locations and dates of treatment, please contact Kevin Lacey, Associate Director, Contracts and Logistics at 416-776-4274.

For details on any products being used during the program, please contact Pestalto Environmental Health Services Inc. at 1-866-648-7773.
