

Advisory # **2020-A-056**

Subject: Infield Tunnel (West) STANDPIPE SUPPLY LINE Leak Repairs

From: Airport Operations

Contact: Nick Matveev, nick.matveev@gtaa.com, 416-802-9387

Date: Monday, August 24, 2020

To support the repairs of the leaking standpipe supply line, trenching will be required at the west side of the Infield Tunnel, south cell entrance (from cargo side to terminals). The following mitigations will be in place:

Time & Date: Daily 0700-1700 - Wednesday, Aug 26th until Friday, Oct 23rd

Plan: Traffic will be reduced to one lane through the tunnel daily and open again at 1700 each evening. Plates will cover the trenched areas and allow traffic to flow.

There will be flagging personnel controlling traffic at each end of the tunnel to ensure large vehicles or cargo dollies will have the entire width of the tunnel to pass through.
