

Advisory # **2020-A-082**

Subject: Infield Tunnel (West) Standpipe Supply Line Leak Repairs

From: Airport Operations

Contact: Jeremy Schoular; Jeremy.schoular@gtaa.com; 416-770-1087

Date: Tuesday, December 15, 2020

To support the repairs of the leaking standpipe supply line, trenching will be required at the west side of the Infield Tunnel, south cell entrance (from cargo side to Terminals). The following mitigations will be in place:

Times & Date: Daily 0700-1700 Tuesday December 15th to Thursday December 24th 2020, excluding weekends.

Plan: Traffic will be re-directed to the North cell with 1 lane for each direction of travel. Traffic speeds will be reduced to 30km/h.

There will be flagging personnel controlling traffic at each end of the tunnel to ensure large vehicles or cargo dollies will have the entire width of the tunnel to pass through.
