

Advisory # 2021-A-043

Subject: NPSV Infield Tunnel Reactivation

From: Governance Corporate Safety and Security
Airport Operations – Ground Operations

Contact: Bryan Scott, bryan.scott@gtaa.com, (416)776-3567
or Larry Shack, larry.shack@gtaa.com, (416)776-3254

Date: 2021-09-07

Please be advised that effective Wednesday September 8, 2021 the NPSV – Tunnel location will open and operate on limited hours of 1230-2030L daily. Outside of these hours all vehicle traffic entering via gate 409, from the Gate Gourmet flight kitchen, or from the 3 Bay/CDF airside area **must** proceed to NPSV-Cargo West prior to entering the critical area. A VMS signboard will be deployed as a reminder for the next two weeks.

Please note, vehicles that are able to enter via NPSV - South are encouraged to do so as a means of expediting access.

All vehicles entering and remaining in the critical area of the airport must attend to a NPSV location for purposes of undergoing security screening. Failure to report to and be subjected to security screening will result in enforcement action, up to the revocation of the vehicle occupants' RAIC.

Employers are encouraged to advise and remind employees during daily briefings and as part of retraining for returning staff to ensure awareness.
