

Advisory # 2021-A-060

Subject – Baggage Handling System Baggage Weight/Size Restrictions

From: Airport Operations, Baggage Services

Contact: Michael Dyl, mike.dyl@gtaa.com, 416-776-4096

Date: 2021-12-10

To ensure a safe and efficient operation of the Baggage Handling System (BHS) it is imperative that baggage size and weight specifications are adhered to. Please be advised that the limits for checked baggage are as follows.

Up to 23Kg – regular bag and can be inducted onto BHS main lines.

23kg to a maximum of 32kg may be inducted onto BHS main lines provided a heavy bag tag with weight indication is affixed to the bag (Airline specific overage charges apply).

Bag Dimensions for induction onto mainline conveyors must be within the following dimensional tolerances.

Length 1100mm (44")

Width 762mm (30")

Height 762mm (30")

Bags exceeding these dimensions are to be inducted at oversize conveyors. Car seats, golf clubs, skis, fishing rods, rifles, any other long, flat or overweight items must be inducted on oversize belts.

Carriers/Groundhandlers will be responsible for assisting with or retrieving oversize and heavy bags (over 23kg) that are found within the system or that arrive in the Recon room.
