

Advisory # 2022-A-014

Subject: Runway 06L/24R and Associated Taxiway Closure

From: Airport Operations

Contact: Arwen Raynham, arwen.raynham@gtaa.com, 416-677-0614

Date: 2022-03-31

Runway 06L/24R will undergo a full depth rebuild including both civil and electrical upgrades and requires a full closure of the surface commencing on April 4th, 2022 at 06:30L. This work will take place over a period of approximately 8 months with a tentative completion date of November 18th.

Construction will be achieved in multiple overlapping phases, working from West to East in order to mitigate and minimize the resulting operational impact. Each phase of work will see closures of various associated Taxiways and will have varying impact on adjacent Runway 06R/24L while still maintaining operations on that runway. A combination of phases as depicted in the following diagrams will commence on April 4th and April 11th respectively.

Please consult NOTAMS for related surface closure information.
