

Advisory # 2022-A-024

Subject: Closure of North Service Road

From: Airport Operations

Contact: Jeremy Schoular, jeremy.schoular@gtaa.com 416-770-1087

Date: 2022-06-21

The next phase of the Bombardier Facility requires the contractor to temporarily move the current Primary Security Line (PSL) to the middle of the North Service Road. This PSL adjustment has been part of the design of the facility and end state will include the PSL being placed atop a block-style retaining wall. This work is necessary to continue construction at the facility.

The north lane shall be closed until the retaining wall has been constructed, while the south lane shall remain open. Leone Fence will be providing traffic services to facilitate single lane traffic between Taxiway JD and the North Service Road adjacent to Taxiway J2.

All airside operators are reminded to adhere to all Airport Traffic Directives and to pay specific attention to traffic personnel in the area. It is critical that all vehicles remain clear of Taxiway JD when traffic mitigation operations are in effect.

This temporary PSL move will run from June 27 to June 30, 2022, with the fence remaining on the North Service Road until the end of 2022 for retaining wall work.

For any questions, please contact Jeremy Schoular, jeremy.schoular@gtaa.com.
