Airside Restoration Project – Flagging operations around Gate 313

From: Airport Development and Technical Services - Engineering, Architecture & Construction

Contact: Yoshi Shrestha, Yoshi.shrestha@gtaa.com, 416-453-6502

Date: 2022-07-13

As part of the Airside Restoration project the construction vehicle accessing 06L/24R will be using Access Gate 313. Due to high volume of traffic using this gate the Project Team will be implementing additional signage in the area. For the safety of the vehicles in the area the speed limit will also be reduced to 40km/h. A flagging personnel will be present on site when the contractor is anticipating high volume of traffic at the Access Gate 313. This configuration will go into effect from July 14th till November 30th, 2022.

If you have any questions or concerns regarding this work, please contact Yoshi Shrestha using the above contact information.
