

Advisory # 2022-A-034

Subject: Masking Requirements

From: Governance, Corporate Safety and Security

Contact: Dwayne Macintosh, Dwayne.macintosh@gtaa.com

Date: 2022-08-08

Wearing a mask while working in or passing through the public areas of airport terminals is required at Toronto Pearson. All contractors and airport employees must always carry an appropriate mask with them, even if their primary work location is not in the public area of the terminals and/or their employer does not require masking in their work area.

In addition, security screening checkpoints (NPS and NPS-V) remain areas where contractors and airport workers must always be masked. Contractors and airport workers should be prepared to put on a mask when entering NPS or approaching NPS-V in their vehicles.

Thank you to everyone for continuing to work together to make our workspaces a safe place for our passengers and employees.
