

Advisory # 2023-A-039

Subject Temporary Expansion of the Critical Area that is Restricted (CRA) Extension to Advisory 2023-A-036

From: Governance Corporate Safety and Security

Contact: April McConkey, april.mcconkey@gtaa.com, 416-574-0165

Date: November 10th, 2023

Advisory 2023-A-036 stated that a temporary change to the Critical Area would end on November 11th. Due to the extended construction, this date, which was to be concluded on November 11, has now been extended to Monday, November 13, 2023. As a result, the equipment parking areas across from the Triturator facility along the South Service Rd will be included in the Restricted Area that is Critical (CRA) until Monday, November 13, 2023, at 2100. This temporary change is being made to allow for traffic movement for vehicles using the South Service Rd, as the road will be under construction during this time, resulting in reduced lane capacity. It's important to note that vehicles that enter this temporary CRA area are not required to be rescreened.

Please see the map below for the location of the Temporary Restricted Area that is Critical(CRA).
