

## Advisory # 2023-A-040

**Subject: Transborder/Preclearance Area Sterility**

**From:** Airport Operations & Governance, Corporate Safety and Security

**Contact:** Richard Attenborough, Richard.Attenborough@GTAA.com, 647-616-1373  
Amaury Godin, Amaury.Godin@GTAA.com, 416-573-0316

**Date:** 2023-11-10

As a reminder to Advisory 2023-A-019

To continue supporting our airline partners with sterility concerns, we install visual indicators to assist with Directive 2023 - D -003 - Security Breaches in the Transborder Designated Area.

The GTAA remains committed to aiding and ensuring sterility is maintained during swing operations. As a result, we have installed slide signs in the arrivals corridors at the following gates;

**Terminal 1** – Gates 153, 136, 132. The sliding indicator is mounted above the keypad to confirm the lounge configuration.

**Terminal 3** - B18, 19. The sliding indicator is mounted beside the keypad to confirm the lounge configuration. Example of Slide Sign:

**The red/US Flag** indicates lounge is configured to Transborder. Offloading passengers cannot be directed into the lounge.

**The green/Canadian Flag** indicates Domestic configuration. Domestic arriving passengers can be directed into the lounge.
