Directive *(vertical, left margin)*

Toronto Pearson
For You. The World.

Supercedes: [NA]　　　　　**Directive** # G02-2023-D-016

Subject: Securing PLC/OT/ICS Panels

From: Airport Development and Technical Services - Facilities Systems Engineering

Contact: Mike Robertson, 905-875-8266

Date of Issue: 2023-12-08　　　　　**Effective Date**: 2023-12-08

Expected Action: Programmable Logic Controllers (PLC) and OT/ICS (Operational Technology or Industrial Control System) components are typically housed within a physical cabinet; these cabinets must be locked and always secured unless being actively serviced by authorized personnel. If a cabinet is unable to be locked (e.g. Lock missing or broken), contact otcybersecurity@gtaa.com to report the issue. This Directive shall take effect immediately and retroactively for all areas of the existing assets, airport projects and initiatives in development.

Contact ICSOT group (otcybersecurity@gtaa.com) for further questions, additional information, or concerns.

Background and Impact: This Directive is based on the GTAA ICS OT SCADA Policy and Standard. It will address the safety and security of our personnel, assets, and airport systems.

Bernardo Gogna
Chief Infrastructure Officer
