

GTAA Safety Policy

At the Greater Toronto Airports Authority, health, safety and security are our top priorities. These are supported by our vision of zero injuries. All individuals employed at the GTAA are collectively responsible for health, safety and security. We need to strive every day to ensure the airport is free of hazards and operated in a safe manner by:

- Living a culture of safety where all employees feel accountable for their own safety and that of the entire airport.
- Obligating all employees to identify, report and address health, safety and security concerns.
- Complying with all applicable health, safety and security legislation, regulations, standards or laws;
- Providing training for all GTAA employees, in respect to their health, safety and security responsibilities;
- Setting specific, measurable and obtainable targets for health and safety performance; and
- Continuously improving health and safety at the airport.

This policy applies to all employees of the GTAA.
