Reporting Hazards and Incidents

When a hazard is identified or an incident occurs, they must be reported in the moment. Reporting is crucial for:

- Protecting yourself and others
- Preventing future accidents
- Improving safety measures

EMERGENCY SITUATIONS 416-776-3033

Do not call 911 (except at Airway Centre)

Potential injuries, fire, fuel spills or life-threatening situations.

URGENT NON-EMERGENCISS 416-776-3055

Non-chemical spills or leaks, icy floors, maintenance issues, aircraft cut-offs, airside equipment, airside parking concerns.

SECURITY CONCERNS 416-776-7381

Flag unattended items, gates or doors not closing/securing, piggybacking, vandalism, suspicious vehicles/persons, need/right violations.

Proactive Concerns and Near Misses

Proactive safety concerns spot and address safety risks before they lead to harm or incidents. They anticipate problems instead of reacting to them.

Taking action in advance helps:

- Prevent accidents
- Avoid injuries
- Reduce damage
- Create a safer environment

Near misses are unplanned events that could have caused injury, illness or damage, but didn't, thanks to chance or quick action. Reporting near misses helps:

- Reveal hidden hazards
- Prevent serious incidents
- Identify root causes
- Improve safety systems

Near misses are warnings.

Report them to stop
accidents before
they happen.
