

Foreign Object Debris (**FOD**) is anything that doesn't belong on the airfield. Even small items can create serious safety hazards.

If you find FOD:

- Remove it if safe to do so
- Place it in a designated FOD bin
- Report large items that cannot be moved safely: **416-776-3055**

Help keep FOD bins available for everyone:

- Report bins that are full, damaged, or not closed properly
- Use FOD bins for airfield debris only

Dispose of other materials correctly:

- LAV suits, latex gloves and grooming garbage belong in UPAK bins
- Oil, skydrol and used rags are hazardous materials and must follow proper hazmat disposal procedures

Don't leave anything behind:

- Any tools or equipment brought airside should leave with you.
- Check your work area before you go.
