

When working below the wing (ramp, baggage laterals and apron), it is mandatory to wear a safety vest and footwear that is approved by the Canadian Standards Association (CSA). Additionally, when we are working outside during the winter, we must prepare to face cold and windy conditions.

Follow these tips for dressing in winter:

- **Check the forecast before your shift** to prepare and dress for the weather.
- **Wear loose-fitting layers over a base layer** to retain body heat.
- **Wear a windproof and waterproof coat that is reflective as your top layer.** Your reflective outer piece needs to be CSA-approved Class 2 reflective safety vest standard.
- **Use the two-layer sock system.** Wear a thin sock to wick away moisture and a wool sock on top to keep your feet warm. Bring an extra pair of socks in case you need to change during the day.
- **Wear insulated work boots** to keep you warm throughout your day.
- **Always wear a toque or winter hat.** You lose 30-50 percent of heat from your head. On extremely cold days, you may require more than one toque to keep warm.
- Ensure your RAIC is visible on your outer most layer
