

GTAA ENVIRONMENTAL POLICY

Toronto Pearson International Airport

The Greater Toronto Airports Authority (GTAA) is committed to operate airports in an environmentally responsible manner, in compliance with relevant environmental legislation, other relevant requirements and within an overall framework that is environmentally, economically and socially sustainable. Our commitment is reflected in the GTAA's day-to-day operations to minimize impacts on the natural environment and local community.

The GTAA is committed to continual improvement and the prevention of pollution. It is our policy to set environmental objectives and targets and implement action plans for significant environmental aspects identified at the airport. It is also our policy to monitor progress, utilize best management practices and apply cost-effective technology to strive to improve environmental performance.

To successfully implement this policy, the GTAA utilizes an Environmental Management System (EMS) which meets the specifications of the ISO 14000 international standards series and which includes:

- Utilizing environmental audits to ensure compliance with applicable laws, regulations, as well as policies, objectives and targets.
- Conducting regular environmental monitoring of environmental aspects such as water quality, air quality, noise, airside development, hazardous substances and spill incidents.
- Continually developing and promoting environmental standards applicable to day-to-day airport operations which impact the environment.
- Integrating environmental assessment and management practices into the decision-making process used to plan, design, construct and operate the airport.
- Communicating environmental policy, roles, responsibilities, objectives and targets to GTAA staff.
- Producing an annual environmental performance report to ensure regular reporting to the CEO and Board of Directors, GTAA employees, and the interested public.
