   @TorontoPearson

Toronto Pearson is the country's largest airport and a driver of the national economy, but we understand that along with these benefits come impacts, such as noise. We're committed to working with our neighbours to make sure that noise management remains a part of the conversation as the airport grows in step with the communities we serve.

Through our Noise Management Action Plan, we're working to manage noise impacts. The Noise Management Forums are a series of briefings, tables and working groups that will help us work smarter with our communities and collaborate better as an industry to balance the benefits that an international airport brings to Southern Ontario with the associated noise impacts.

At the Pearson Public Meeting – one of our Noise Forums – you'll have the opportunity to learn more about airport operations, what we're currently doing to manage noise impacts, and to provide your feedback to industry partners. Thank you for joining us.

#### RECAP OF MEETING ON SEPTEMBER 26, 2019

Where we are in the conversation...
